

Claims

1. A rubber composition comprising a rubber component, polybutene and a white carbon.

2. A rubber composition as defined in Claim 1 further comprising a
5 silane coupler.

3. A rubber composition as defined in Claim 1 further comprising a clay.

4. A rubber composition as defined in Claim 1, comprising adding 5
~ 60 parts by weight of polybutene and 5 ~ 100 parts by weight of white
10 carbon to 100 parts by weight of the rubber component and mixing them.

5. A rubber composition as defined in Claim 4 comprising further adding 0.5 ~ 8 parts by weight of silane coupler and mixing it.

6. A rubber composition as defined in Claim 4 comprising further adding 5 ~ 100 parts by weight of clay and mixing it.

7. A rubber composition as defined in Claim 1, wherein said rubber
15 composition has a shape of a water supply pipe.

8. A rubber composition as defined in Claim 1, wherein said rubber composition has a shape of a part of a water supply pipe.

9. A rubber manufactured from a rubber composition as defined in
20 any of Claims 1 through 6.

10. A part for a water supply pipe manufactured using a rubber composition described in Claim 1.
